List Animations

```kotlin
LazyColumn() {
    val visitsSorted = visits.sortedWith(comparator)
    itemsIndexed(visitsSorted, key = { _, item -> item.start_date!! })
{ index, visit ->
        NewVisitRow(
            visit = visit, index = index, modifier = Modifier
                .animateItemPlacement(
                    animationSpec = tween(
                        durationMillis = 1000,
                        easing = LinearOutSlowInEasing)
        ))
    }
}
```
